

IN THE CLAIMS

Please amend the claims as follows:

Claims 1-15 (Canceled).

Claim 16 (Currently Amended): An information storage medium configured to have data recorded thereon and data reproduced therefrom by an information recording/reproducing apparatus, said data including control information and audio/video data having a still picture video object, said medium comprising:

a control information area for storing,

a still picture audio/video file information table including still picture audio/video file information for managing the still picture video object,

original program chain information located after the audio/video file information table, and

a user defined program chain information table located after the original program chain information,

wherein said original program chain information includes still picture cell information corresponding to a still picture cell,

said still picture cell information includes still picture cell general information,

said still picture cell general information includes numeral information of a start still picture VOB entry of one or more still picture VOB entries and numeral information of an end still picture VOB entry of the still picture VOB entries,

said still picture audio/video file information includes group information of the still picture video object,

said group information includes said still picture VOB entries ~~entry information of the still picture video object;~~

a data area for recording the audio/video data is configured to include a sub-picture stream, wherein said entry information includes entry type information containing number information indicating whether the sub-picture stream is included, and

~~said sub-picture stream is configured to include bitmap data, and~~

the information recording/reproducing apparatus accesses the control information area to reproduce the still picture video object.

Claim 17 (Currently Amended): An information recording method for recording data on a medium configured to have data recorded thereon and data reproduced therefrom by an information recording/reproducing apparatus, said data including control information and audio/video data having a still picture video object, said medium comprising,

a control information area for storing,

a still picture audio/video file information table including still picture audio/video file information for managing the still picture video object,

original program chain information located after the audio/video file information table, and

a user defined program chain information table located after the original program chain information,

wherein said original program chain information includes still picture cell information corresponding to a still picture cell,

said still picture cell information includes still picture cell general information,

said still picture cell general information includes numeral information of a start still picture VOB entry of one or more still picture VOB entries and numeral information of an end still picture VOB entry of the still picture VOB entries,

said still picture audio/video file information includes group information of the still picture video object,

said group information includes said still picture VOB entries ~~entry information of the still picture video object, and~~

a data area for recording the audio/video data is configured to include a sub-picture stream, wherein said entry information includes entry type information containing number information indicating whether the sub-picture stream is included, ~~and~~

~~said sub-picture stream is configured to include bitmap data,~~

said method comprising:

recording the audio/video data on the data area; and

storing the control information on the control information area.

Claim 18 (Currently Amended): An information reproducing method for reproducing data from the medium configured to have data recorded thereon and data reproduced therefrom by an information recording/reproducing apparatus, said data including control information and audio/video data having a still picture video object, said medium comprising, a control information area for storing,

a still picture audio/video file information table including still picture audio/video file information for managing the still picture video object,

original program chain information located after the audio/video file information table, and

a user defined program chain information table located after the original program chain information,

wherein said original program chain information includes still picture cell information corresponding to a still picture cell,

said still picture cell information includes still picture cell general information,

said still picture cell general information includes numeral information of a start still picture VOB entry of one or more still picture VOB entries and numeral information of an end still picture VOB entry of the still picture VOB entries,

said still picture audio/video file information includes group information of the still picture video object,

said group information includes said still picture VOB entries ~~entry information of the still picture video object, and~~

a data area for recording the audio/video data is configured to include a sub-picture stream, wherein said entry information includes entry type information containing number information indicating whether the sub-picture stream is included, ~~and~~

~~said sub picture stream is configured to include bitmap data,~~

said method comprising:

reproducing the control information from the control information area; and

reproducing the audio/video data from the data area.

Claim 19 (Previously Presented): An information reproducing apparatus for reproducing data from the medium as defined in claim 16, said apparatus comprising:

a first reproducer configured to reproduce the control information from the control information area; and

a second reproducer configured to reproduce the audio/video data from the data area.
